1. Introduction

Dealls is the #1 job portal in Indonesia, connecting job seekers with high-quality opportunities from over 3,500 top companies. Beyond just job listings, Dealls also empowers job seekers through free mentoring programs and CV review services — all aimed at helping them land their dream careers faster and more effectively.

One of the latest upcoming features that will further enhance the platform's value is the **Mentoring** feature. This feature is designed to provide users with the opportunity to engage in **1-on-1 career mentoring sessions** with experienced mentors. Uniquely, Dealls allows users not only to **book mentoring sessions** but also to **register themselves as mentors**, fostering a two-way learning environment.

The goal of this feature is to create a more collaborative and supportive community where members can receive personalized feedback and career guidance. Through more intensive discussions and tailored advice, users can accelerate their professional growth and confidently take the next steps in their career journey.

2. Types of Testing

- UI Test
- Functional Test
- Integration Test
- End to End Test
- Smoke Test
